

Monitoring Touch Appliance (MON-TOUCH2)

Introducing the Monitoring Touch Appliance, a versatile Microsoft Surface GO2-based open computer designed to streamline data logging, monitoring, and alerting directly at the edge of your network. With optional Cellular connectivity, it ensures alerts can reach you anywhere via Email, SMS, or Slack. Soon, collected data can be seamlessly normalized, aggregated, or transmitted to your preferred Cloud platform, including AWS, Gcloud, Azure, or others. Compatible with various devices and boasting a user-friendly interface, it offers accessibility from tablets, desktops, or smartphones, while meeting FIPS 140-2 standards for security.
